

TRANSPORTATION ASSET MANAGEMENT COUNCIL
MONTHLY REPORT: MARCH 2003

- Susan Berquist, Michigan Department of Transportation, made a presentation on National Functional Classification at the March Council meeting.
- The Work Program was finalized and copies were sent to all regional planning agencies/MPOs, Council parent agencies, and key stakeholders. The Work Program was disseminated by email with no direct printing costs incurred.
- The “Pilot Project” was reviewed by the Council. The objectives of the project were achieved and it served the purpose for which it was intended. While the Council had no direct input into the development or conduct of the project, they assumed oversight jurisdiction in November of 2002. After receiving a final overview of the results of the pilot, the Council determined that this project was finished.
- The draft Annual Report has been prepared and disseminated to Council members for their review and comment.
- The major activity conducted during the month of March was the dissemination of the survey to state and local road agencies. This survey is intended to provide the Council with information regarding “what” types of pavement management methods are being used currently and “how” they are being used. The results of the survey will be presented at the April meeting and provided to others through the Council’s website.
- Attached are two spreadsheets. The first is the budget status. The second is the status of work items in the Council’s Work Program.
